

Armored Ford E350 Command and Control Vehicle

The MDT armored Command and Control (C2) Vehicle provides a safe and comfortable working environment. Equipped with a wide work table, map wall and, lighting and night-time curtains, it enables 4 people to run typical C2 operations. All this, with B6 ballistic protection, for both stationary and on the go missions.

Options include communications equipment, computers, navigation gear, intercom, external light-bar, etc.

MDT Armor is a leader in state-of-the-art lightweight armoring of vehicles. MDT Armor uses technology that has been continuously upgraded using extensive battlefield experience accumulated by the Israeli Defense Forces. It has introduced advanced engineering techniques, and sophisticated, lightweight materials. MDT Armor has proven itself in numerous terror attacks, saving passengers' lives. Time and time again.
